

Bài 7: CLIMATE CHANGE

Mục tiêu cần đạt được:

Về kiến thức:

- + Sinh viên hoàn thành Bài kiểm tra số 2.
- + Sinh viên biết sử dụng *will/ won't* để nói về sự phỏng đoán trong tương lai.
- + Sinh viên biết các từ vựng về đo lường.
- + Sinh viên có thể liệt kê các từ vựng về biến đổi khí hậu.

Về kỹ năng:

- + Sinh viên có thể đọc hiểu các văn bản ngắn và đơn giản về chủ đề biến đổi khí hậu.
- + Sinh viên có thể nghe hiểu 1 đoạn video ngắn về chủ đề biến đổi khí hậu, hệ quả của biến đổi khí hậu.
- + Sinh viên có trình bày các dự đoán về tương lai (*your partner's future*).

CDR 7.1. 7.1 Biết các từ vựng về các đơn vị đo lường

- Thời lượng: 2 tiết

Nội dung giảng dạy:

7.1 Measurements

7.1.1 Listening: A documentary about two photos by Ira Block

A Look at the two photos and answer the question *Where are these places?* Compare the two places in the photos.

B Listen to part of a documentary about the photographer, Ira Block, and two photos.

Complete the sentences with the missing number.

Before you listen:

Pay attention to the key words in each sentence when you are listening.

North Pole/ South Pole

Equator

The Arctic/ Antarctica

South Carolina

temperature

Note:

- **North Pole:** The northernmost point on Earth, located in the Arctic Ocean.
- **South Pole:** The southernmost point on Earth, located on the continent of Antarctica.
- **Equator:** An imaginary line around the middle of the Earth, dividing it into the Northern and Southern Hemispheres, at 0° latitude.
- **The Arctic:** A polar region around the North Pole, mostly covered by sea ice.
- **The Antarctica:** A continent around the South Pole, covered by ice and surrounded by the Southern Ocean.
- **South Carolina:** A state located in the southeastern region of the United States. It is bordered by North Carolina to the north, Georgia to the south, and the Atlantic Ocean to the east.
- **temperature:** A measure of how hot or cold something is, usually measured in degrees Celsius (°C) or Fahrenheit (°F). Temperature indicates the amount of thermal energy present in a substance or environment.

While you listen:

Take notes the information you hear from the documentary.

1. The Inuit man lives about kilometres from North Pole.
=> 500
2. The US state of South Carolina is about kilometres from the equator.
=> 2500
3. million years ago, the Arctic probably looked like South Carolina.
=> 56
4. At the time, the temperature in the Arctic was round °C.
=> 25
5. Nowadays, the average temperature in the Arctic is around °C.
=> -10

C Answer the questions.

1. Is your country nearer to the Arctic, the Antarctic or the Equator?
=> *Vietnam is closest to the Equator. It lies in Southeast Asia, roughly between latitudes 8° and 23° N. This places it significantly closer to the Equator than to either the Arctic or Antarctic.*

2. Where is it spring or summer at the moment? In the northern or southern hemisphere?

=> *In Vietnam, it's currently summer. Vietnam is in the Northern Hemisphere, so the seasons follow the Northern Hemisphere's patterns. Summer in Vietnam typically lasts from June to August, while spring usually occurs from February to April.*

7.1.2 Vocabulary: Measurements

Place something quite heavy on a table in front of the class. It could be your school bag or a plastic bag full of your shopping. Ask and answer: *How big is it? How wide is it? How heavy is it? How warm is it?*

Note: Find out how well you can use measurements. You could weigh and measure your bag before the lesson so that you can correct or confirm your guesses.

A Match the abbreviations with the meaning and the type of measurement.

Measurement is a system to measure the height, weight, capacity or even amount of certain objects. Some types of measurement are kilometre, kilogram, degree Celsius, percentage, litre, etc.

Look at the table on P.142 and match the abbreviations with the meaning and the type of measurement.

1. %	percentage	an amount out of 100
2. °C	degree Celsius temperature	
3. km	kilometres	distance
4. l	litres	quantity of water (or liquid)
5. m ²	square metres	area
6. kg	kilograms	weight

B Complete these facts about the Earth with the abbreviations from Exercise 1.

1. The temperature at the centre of the Earth is about 7,500

=> °C

2. The North Pole is over 20,000 from the South Pole.

=> km

3. 70 of the Earth's surface is water.

=> %

4. 148,940 million of the Earth is land.

=> m²

5. Objects on the Earth weigh less on the Moon. 100 on the Earth is 16.5 on the Moon.

=> kg/ kg

6. Every day, 914,000,000,000,000 falls on the Earth.

=> l

C Work in pairs. Choose the correct options.

Read through the Wordbuilding box as a class. Refer the page 99 of the Workbook for further information and practice. Check your answers with a partner before discussing as a class.

1. What's the **long/ length** of a marathon?

=> length

2. How **deep/ depth** is the Mariana Trench?

=> deep

3. Sweden has the tallest men and women in the world. What is the average **high/ height**?

=> height

4. How many **kilograms/ kilometres** equals one mile?

=> kilometres

5. What **percentage/ area** of the world's population live in China?

=> percentage

6. Does a kilogram of metal or a kilogram of plastic **weigh/ weight** more?

=> weigh

CDR 7.2. 7.2 Đọc hiểu các văn bản ngắn và đơn giản về biến đổi khí hậu

- Thời lượng: 1 tiết

- Phương pháp: Giảng dạy lý thuyết

- Mức độ yêu cầu:

- Số lượng câu hỏi:

Nội dung giảng dạy:

7.2 Climate change

7.2.1 Discussion

A Discuss the questions as a class.

1. What is the climate in your country (hot, cold, etc.)?

2. In recent years, has the climate changed? How?

Make brief answers to the questions about your country, using the key words *increase* (go up) and *decrease* (go down).

Look at the sample answers:

1. *Vietnam's climate is hot and humid.*
2. *In recent years, temperatures have increased, while rainfall patterns have become more erratic.*

B. Answer the questions for each map.

Look at the two maps on P.143, answer the question *What can you see?*

Discuss the three questions quickly in pairs, then give feedback.

1. *What does the map show?*

=> *The map shows the temperature and rainfall change.*

2. *How many years is it for?*

=> *For the period of over 30 years.*

3. *How does it show the change?*

=> *It shows the change by different colours.*

7.2.2 Reading: Climate change

Look at the maps again and discuss in pairs whether the statements are true or false.

Map 1

1. *The temperature in the Arctic Circle has decreased by 4°C.*

=> F

2. *The temperature change in the northern hemisphere is higher than in the southern hemisphere.*

=> T

3. *The temperature in some parts of Antarctica has decreased by 2°C.*

=> T

Map 2

4. *Rainfall has increased in western Australia and it has decreased in eastern Australia.*

=> T

5. *Rainfall has increased in all of Europe.*

=> T

6. *Rainfall has decreased in parts of Africa by 10%.*

=> T

CDR 7.3. 7.3 Đưa ra được các dự đoán về tương lai

- Thời lượng: 2 tiết
- Phương pháp: Giảng dạy lý thuyết
- Mức độ yêu cầu:
- Số lượng câu hỏi:

Nội dung giảng dạy:

7.3 Our future

7.3.1 Grammar: *will/ won't* for predictions (Simple Future)

A Simple Future

Use:

We use ***will/ won't*** to talk about what we think or know about the future. Look at the examples:

The temperature will increase.

The rainfall won't increase.

Will the temperature increase?

It will be 30 degrees this afternoon.

It won't (= will not) rain tomorrow.

Note: We often use ***I (don't) think/ believe/ suppose + will***.

I think they'll be late.

I don't think you'll like Greece in August - it's so hot.

but we don't normally use ***I think + won't*** as a negative form. We use ***I don't think + will*** instead.

I think the weather won't get better this week.

I don't think the weather will get better this week.

Form:

Affirmation: I/ you/ we/ they/ she/ he/ it + will + V_infinite + Obj

Negative: I/ you/ we/ they/ she/ he/ it + will not/ won't + V_infinite + Obj

Questions: Will + I/ you/ we/ they/ she/ he/ it + will + V_infinite + ...?

⇒ Yes, ... will.

⇒ No, ... won't.

We normally use the contraction ***'ll*** after a pronoun.

He'll probably be late; there's a lot of traffic today.

Note: The contraction of will not is ***won't*** (NOT ***willn't***).

I won't do very well in the exam; I don't understand this topic.

The verb **will** is a modal verb.

The verb doesn't change after **he/she/it**.

We don't use the auxiliary **do/does** to make negatives and ask questions.

The verb after **will** is an infinitive without **to**

Expressions for Simple Future:

- in + thời gian (trong ... nữa)
- tomorrow (ngày mai)
- next week/ next month/ next year (tuần tới/ tháng tới/ năm tới)
- next Monday/ summer/ holiday
- perhaps
- probably

B Reorder the words to make sentences about the future (Ex. 10 – P.143).

1. it/ be/ hotter in my country/ in the future/ will
2. Increase/ the rainfall in this country/ in the future/ won't
3. I don't think/ increase/ the number of dry deserts/ will
4. be/ longer/ will/ summers/ there
5. The percentage of people living in cities/ decrease/ will
6. English/ everyone/ speak/ will
7. Petrol/ won't / people/ use/ in their cars
8. Move to/ I'll/ a warmer/ I think/ country

Key:

1. *It will be hotter in my country in the future.*
2. *The rainfall in this country won't increase in the future.*
3. *I don't think the number of dry deserts will increase.*
4. *There will be longer summers.*
5. *The percentage of people living in cities will decrease.*
6. *Everyone will speak English.*
7. *People won't use petrol in their cars.*
8. *I think I'll move to a warmer country.*

7.3.2 Writing and Speaking: Your partner's future

A Think about your partner's future. Write four sentences about:

- his/ her future job.
- his/ her future travel
- his/ her future home

- one other thing in his/ her future

Here's an example of sentences about his/ her future:

1. **Future job:** *In the future, he will likely have a successful career as a software engineer, leading innovative projects in technology.*
2. **Future travel:** *She will travel to several countries in Europe, exploring new cultures and cuisines every summer.*
3. **Future home:** *She will live in a spacious, modern apartment with a beautiful view of the city skyline.*
4. **Other thing:** *In the future, he will also pursue a passion for photography, capturing stunning landscapes and creating a personal photo gallery.*

B Tell your partner your sentences.

Look at the example:

A: *I think you'll become a musician in the future?*

B: *I don't think I will. I can't play a musical instrument.*

Bài tập luyện tập

Exercise 1: Write the measurements as numbers and abbreviations

1. The area of Antarctica is fourteen million square kilometres.
=> The area of Antarctica is **14,000,000 km²**.
2. Water becomes ice at a temperature below zero degrees Celsius.
3. The average adult should drink two point five litres of water per day.
4. Thirty per cent of the Earth's surface is dry land.
5. The height of the tallest tree on Earth is one hundred and thirty metres.
6. The weight of the International Space Station (ISS) is four hundred and nineteen thousand, four hundred and fifty-five kilograms.

Key:

2. 0°C
3. 2.5l
4. 30%
5. 130m
6. 419,455kg

Exercise 2: Choose the correct option to complete the sentences.

1. We think we *will/ won't* visit Mount Etna next year. It is easy to go there.
2. I *will/ won't* be busy tomorrow, so you should come and see me now.
3. There *will/ won't* be many children in the park today because it's raining.
4. She doesn't think she *will/ won't* have time to study at the weekend.
5. I think the number of university students *will/ won't* decrease because it's so expensive.
6. He *will/ won't* come to our dinner party. He has too much work to do.
7. They *will/ won't* go camping with us because they prefer to stay in hotels.

Key:

1. will
2. won't
3. won't
4. will
5. will
6. won't
7. will

Exercise 3: Find the mistakes in six sentences.

1. My parents will to arrive soon.
2. There will be more things to see in Lisbon.
3. He wills be tired tomorrow morning because he went to bed late.
4. There will be a lot of floods and droughts in the future.
5. We think our customers won't buy the new product.
6. Do factories will produce less pollution in the future.
7. I don't will have time to see you after my lesson.
8. He doesn't think it won't snow this winter.

Key

1. will to => will
- 2.
3. wills => will
- 4.
- 5.
6. Do factories will => Will factories

7. don't will => won't

8. won't => will
